Axxis – Now Offers Access to Bostitch Packaging Products

We are pleased to announce that Axxis is now a master distributor for Stanley Bostitch packaging tools and fasteners. With the addition of Bostitch, Axxis now has the widest Carton Closing offering in the industry. We can deliver Klinch-Pak, Bostitch, and Josef Kihlberg all from one source.

To kick off our new partnership, we are introducing the first Battery Operated Carton Closing Stapler for C type stick staples. The tool will accommodate both 5/8" and 3/4" leg staples with the turn of a dial. This unique tool has easy-to-use adjustments for depth of drive and tightness of clinch. The magazine features a quick release to allow for quick clearing of jams. The kit includes 2, 12V batteries and a charger. Each battery has enough life to shoot up to 800 staples, and can be recharged in only 45 minutes.

Move over tape! Staples offer a stronger, more secure seal, and now there is a better portable option. The DCS-3219 will help revolutionize the staple industry. There is no longer a need to be tied down to a compressor and hose. This tool can be used at every shipping desk, warehouse, by the fish mongers, and in the produce field.
