

Klinch-Pak K-590 Series Staplers

We are pleased to introduce new staplers for the K-590 series staples. We are offering 2 configurations; the KP-35T-590 plier stapler, and KP-35-590W stapler with walking stick. Both models are designed to handle all your heavy duty corrugate stapling needs. The K-590 series staples are a specially designed flat wire to eliminate tearing through the corrugate material.

The KP-35T-590 plier stapler features a fixed anvil that allows for rapid lateral movement. The anvil offers 2.6" of throat depth for proper staple placement. Anvil height is adjustable with spacers (included), to accommodate different thickness corrugate. This tool will handle up to 1/2" thick material. The tool weighs 5.5 lbs. and will hold 100 staples. The KP-35T-590 plier is meant for stapling double and triple wall corrugate sheets, trays & lids, edge protectors, end caps, and container inserts.

The KP-35-590W stapler with walking stick features a 33" extension to allow easy access when stapling Gaylord boxes, bins, and corrugated sheets to pallets. Again handling up to 1/2" thick material. The tool weighs 9 lbs. and will hold 100 staples.

See attached sell sheets for full details.
